There were 44 last haul inspections conducted in this period. These inspections were carried out in demersal and pelagic fisheries fleet segments where the risk to catch fish below the minimum reference conservation size was considered to be the highest and where the high-grading issue was most likely to occur.

EFCA deployed its FPV for four patrols in the WW JDP area. The EFCA FPV was present in the operational area for 53 sea days with one patrol in January and March, and two patrols in April respectively. Five MS (BEL, ESP, FRA, LVA, PRT) deployed 10 inspectors to these patrols.
