4. Summary

This report is covering the joint campaign activities in the Baltic Sea JDP operational area for fisheries under the scope of the SCIP. The report provides overall summary information concerning the joint control activities that were carried out by air, sea and shore based assets and teams of the participating Member States from 1st of January till 31st of December 2020. Due to the Coronavirus disease (COVID-19) pandemic outbreak, MS have adopted national measures to ensure the limitation of physical contact between their nationals to try to control the spread of COVID-19. This resulted in greatly decreased number of physical inspections at sea and in ports of landing.

a) Inspections ashore

During the year 2816 inspections ashore took place with an additional 16 transport inspections, and 32 on business premises such as markets. Ninety five (95) inspections were reported to have taken place on traps and other similar gears, where although in the sea, the inspections originate on the beach with land teams.
